Program management and regulatory services

SynTech Research is a global Contract Research Organization, whose team of seasoned professionals have extensive experience in the research and development of crop production products. The company delivers high quality field and laboratory studies to determine the safety and efficacy of new agrochemicals and crop varieties, adding value and competitive advantage to clients through its in-depth knowledge of the crop protection industry and its products. SynTech Research has developed a reputation as a leading provider of programs at global, regional and country level to over 150 client companies worldwide.

A full management service menu is provided to organizations wishing to develop plant protection products, from new chemical entities or formulations, through to additional territory or crop registrations. It offers a range of multi-discipline and cross-site services to enable customers to plan, manage and deliver all – or elements – of a project, through to completion.

SynTech Research has experienced project managers with scientific and technical skills, who work closely with customers to define objectives and associated trial plans adding value and providing results on time and cost-effectively. They will manage delivery of projects, combining in-house and sub-contracted phases, from the wider SynTech Research organization and its partnerships.

The range of services offered includes:

- Planning of programs and input to protocols to meet technical and commercial objectives, including determination of studies required for biological assessment dossiers
- Program management at global, regional and country level
- Laboratory and field characterization of product performance (GEP), environmental fate and ecotoxicology (GLP), using its network of sites in over 30 countries and partner analytical laboratories
- Reporting in standard and customer-designed formats
- Expert assembly of data and preparation of biological assessment dossiers
- Regulatory submissions to USA-EPA, PMRA, EU, Asia and Latin American authorities by SynTech Research or with partner organizations
