

Job Title: Associate Research Scientist – Aquatics Ecotoxicology

Mission

To provide competitive, independent, investigative research and product development in: crop production; crop protection; food quality; environmental preservation, product stewardship, genetics and seeds.

Essential Duties and Responsibilities

- Assist Research Scientist and/or Team Lead in the design, planning, coordination, application, maintenance, evaluation and execution of laboratory studies in the area of Aquatics Ecotoxicology.
- Assist Research Scientist and/or Team Lead in ensuring all required organisms, supplies, and related activities are in place so that all study activities, as specified in the SOPs, protocol, and performed under GLPs, are completed successfully.
- Assist Research Scientist and/or Team Lead in ensuring all PI responsibilities are conducted in a
 manner that includes: preparing the study notebook and collecting all required data; keeping
 the Study Director up-to-date on all pertinent developments in the planning and conduct of the
 study; interpreting statistics and evaluating studies for regulatory acceptance; preparing reports
 as well as draft study protocols and draft study reports.
- Provide technical direction to Assistant Research Scientists laboratory personnel in order to assure quality work and timely completion of the study.
- May assist with Sponsor communications during study ensuring timely study updates to the Sponsor. Assist Research Scientist in ensuring laboratory, and/or analytical reports for Sponsors are completed in a timely manner and that they are complete and suitable for submission to the appropriate regulatory agency.
- Ensure all Aquatics projects are performed in accordance with Sponsor requirements, SynTech SOPs, and in accordance with GLPs as required.
- Responds to QAU findings and coordinates sample handling with the Sample Management group.
- May assume Study Director responsibilities for all aspects of a study including protocol
 preparation, data collection, data analysis and report preparation. Study Director
 responsibilities include ensuring regulatory acceptance of the study and for defending the study
 if challenged by a regulatory authority or Sponsor. The Study Director also provides study
 critical information to laboratory and the Sponsor Representative or Study Monitor in a timely
 manner. The Study Director also assists in schedule optimization.
- Maintain awareness of new developments in the relevant sciences and of changes in regulatory guidelines and requirements related to agrochemical research and registration. Communicate with staff and management as necessary in order to remain current with Sponsor's needs.
