

a company of
SynTech
Research

We are a leading consulting company offering comprehensive scientific and regulatory services with offices in Stade (DE), Heidelberg (DE), Valencia (ES) and home offices. We assist our clients in the registration of agrochemicals, biopesticides, biocides, feed additives and chemicals (REACH) in Europe and overseas. Our aim is to provide a smooth and successful registration process to ensure safety of these products for the environment and human health.

In order to strengthen our Project Management Team, we are looking for a qualified

Senior Project Manager in Regulatory Affairs (preferably full-time) – (m/f/d) Plant Protection products

Your tasks

As a part of a project team you will:

- Coordinate the preparation of dossiers for the authorization of mainly agrochemicals within the European Union, according to current regulations
- Company-wide project lead with colleagues from various backgrounds: planning, monitoring, organization and controlling for projects from initiation through completion
- Manage and communicate a clear project scope and motivate team members
- Ensure project results meet requirements regarding actual regulatory approaches, technical quality, reliability, schedule and cost
- Provide general consultancy for agrochemicals and develop regulatory strategies
- Manage the project-related data in GAB databases
- Manage projects and interact with international clients and authorities
- Participate in international conferences and workshops, as well as in internal trainings

Desired skills and qualifications

- University degree in agricultural sciences, chemistry, biology, geography or equivalent
- Experience in regulatory affairs of agrochemicals, knowledge in biocides would be beneficial
- Excellent communication skills, fluency in German and English. Another additional European language would be beneficial
- Careful, reliable and swift working style
- Self-motivated, flexible, open and well organized personality, able to work under pressure
- Eager to learn and establish a good working relationship with colleagues, clients and regulatory authorities

We offer

- Opportunity to work within a friendly and supportive environment of highly motivated professionals
- A well structured induction plan and training program
- Working environment where excellence is recognised and encouraged
- Interdisciplinary and international multi-lingual company
- Competitive salary
- Flexible working time and places to support your work-life balance
